3

GeM has been reimagining India's public procurement via technology, analytics & process digitization

Cost Savings

- Reverse auction: ~25% price reduction vs avg. original L1 price
- Guaranteed discounts via direct OEM deals
- Demand aggregation
- Approx. 10% savings est. FY21-22¹

Time Efficiency

- Tender cycle time reduced from 34 to 24 days²
- Standard templates e.g., bid forms, T&Cs
- Fast track procurement e.g., DP upto INR 25K
- On-time delivery up from ~80% to ~97% - for orders paid on GeM

Reach & Inclusiveness

- MSE share >55% of annual GMV since 2016
 - > 8 lakh MSE sellers
 - >1.3 lakh Women,
 - >39K SC / ST sellers
- GeM Sahay: Instant order - based loans to sellers
- Microportals: Startup Runway, TRIBESINDIA e-store

Transparency & Fairness

- Contract data made available in the public domain
- Seller representation window to challenge disqualification
- Transparent authentication through e-sign and DSC

1. Multiple studies including World Bank, National Economic Survey and GeM internal study based on mandatory discounts, RA price reduction, select sample price comparison with other ecommerce and bid data reported by buyers
 2. Comparison of "Bid start" to "Bid close" dates of 704 GeM and out-of-GeM transactions; data reported by buyers

E-Procurement | Various e-procurement methods offered by GeM

Direct Purchase
 For amount less than INR 25,000

Push Button Procurement
 For amount up to INR 1 Lakh

L1

6

Vigilance and Anomaly detection is a key focus area for GeM

Ensuring that the right pricing information is available to the concerned stakeholders

Improve transparency in the system by ensuring accountability across processes

Identifying and reporting deviant behaviour on GeM portal

Proactive engagement with stakeholders by implementing recommendation systems around procurement

By incorporating AI/ML enabled use-cases into existing procurement processes, GeM intends to reduce both administrative and transaction costs for our buyers

7

GeM of the future

Scale: Increase in GMV / transactions / users

GeM grew 150% in FY22; Aiming to be ~3L Cr in GMV in next 3 years and >5L Cr in 5 years

Support # transactions, concurrent users, data volumes

Large scale Open API based integrations

Multiple integrations will be needed. Railway's, 10-s of CPSEs, Non-buyer integrations: Fintech, Logistics, Works, and more

Custom integrations are not scalable; Design with an open API architecture

Driving States adoption @scale, incl. customizations

Higher share of GeM's growth so far has come from Center. Future growth will be via States, which need local rule engines, dedicated front end & local UX, full multi-lingual experience, deep integrations.

Support these at scale

8

Multiple initiatives currently in progress to unlock the next wave of growth at GeM

Key growth vectors

Bringing together all forms of govt. procurement on GeM

Driving grassroots adoption: States, Municipalities, Village Panchayat

Value added services: Fintech, Logistics, Data & analytics

Key enablers

Enhancing "Trust" on GeM: Journey from mandate to customer advocacy

Technology investments: scalability & innovation focus (incl. AI-ML)

Revamping key operations: Marketplace sanity, customer care, incidents

People & organization: Performance oriented team & culture

9

GeM Platform Performance consistently improving despite higher Load

While the Load (Average Users / Month on platform has consistently increased to **2.6 X** (compared to beginning of 2021)

Platform performance in terms of Page Load Times has improved by **2.3 X** (compared to beginning of 2021)

12

GeM Operational Performance consistently improving despite higher number of Orders

While the Number of Orders are increasing (around **1.5 X** compared to same month last year)

Number of Customer Issues is consistently below 1.2 Lakh since Apr'22 (around **1/2** compared to same month last year)

13

GeM Scale - Technical

- GeM started to support **46.8 Lac sellers** and **2.27 Lac buyers** with 1000 user authentication requests/minute, 250+ OTP Validations/Minute
- Being a documentation heavy system, GeM supports ~**50000** documents digitally signed or e-signed every day
- GeM is supported **300+ virtual machines** in cloud landscape of operating systems. **5000+ VCPUs** and **21 Terabytes of RAM** has been virtualized on VM ware hypervisors
- GeM utilizes **41 MySQL databases** which are clustered to support heavy throughput (up to **35000 Queries Per Seconds**). Current **500 Terabytes of File storages** also are very fast growing (**200-250 Gigabytes/day**) for unique requirements in government procurement processes
- **1.8 crore email** and **1 crore SMS** are sent out every month by MSP
- MSP receives **2 Lac product/brand approvals** monthly with a TAT of **1.13 days**
- ~ **42.7 Lac products**, **3.98 Lac services** and ~ **10200 categories** are supported by MSP for GeM
